

## Water Storm Worksheet: What is Photosynthesis?

### Inquiry Questions:

- What is photosynthesis?
  - How does water move through plants?
  - List the three things necessary for photosynthesis to take place
  - List the reactants and products of the photosynthesis reaction
  - What happens if water is not available to the plant?
- Give examples of the types of plant tissues that are built by photosynthesis that we eat (e.g. fruits, leaves, roots). Are they all green?
